**Spotlight: Stains and Dyes**

By [Concrete Concepts Staff](#)

**Super Stone Chlorstain**

Super Stone Chlorstain is a deep penetrating, acid-based stain that can be used on old and new concrete that has cured for 14 to 28 days.

- Provides permanent color with a marbled and shaded effect giving the appearance of natural stone
- Will not peel, chip or fade
- For residential and commercial use

**Stamp Store Rainbow Stain System**

The Stamp Store SS Rainbow Stain System has 26 standard water-borne stain colors available, plus custom colors.

- Eight colors correspond with popular acid stains for quick color matching or correction
- Add subtle accents, boldly change your

concrete color, or adjust color vitality by varying the pigment-to-base ratio

**Triple S acid stains**

Triple-S Chemical Products offers a line of concrete acid stains for patios, floors, living rooms, entryways and sidewalks.

- Available in six colors: Burgundy, Blue, Green, Blue-Green, Lime and Brick

**Scofield Lithochrome Tintura**

Lithochrome Tintura Stain from L.M. Scofield is an environmentally friendly stain that includes vivid reds, yellows, blues, pastel pinks, beiges and grays.

- Penetrates and bonds with porous concrete or cementitious toppings for permanent, nonfading colors
- Durable enough for interior floors, exterior hardscapes and retaining walls
- Compliant with current air quality requirements and does not require acid residue removal and disposal

**Nawkaw water-based stain**

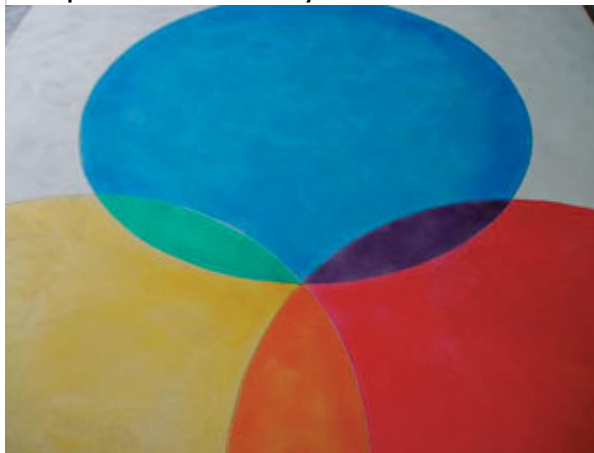

Nawkaw water-based stain is available in custom colors and textures to simulate the look of natural stone and brick.

- Proprietary staining process for deep penetration into surface
- 25-year product guarantee
- Can be used on precast, tilt-up or cast-in-place concrete

DURA-BOND Composite Materials

4 HOUR PUBLIC AUCTION

Direct Colors Patina Acid Stains are highly concentrated with maximum chemical load for the given color.

- Careful inventory control allows freshness to be maintained and concentration to be consistent
- Wide range of color variation can be modified by adding water

**Direct Colors Patina Acid Stains**

### **Kemiko Stone Tone**

Kemiko Stone Tone Stain is designed for interior or exterior use.

- Reacts with concrete to create multihued color variations resembling marble or stone
- Economical, durable and easy to maintain
- Available in eight colors

**Kemiko Stone Tone**

### **Increte Stain-Crete**

Increte's Stain-Crete is a permanent chemical stain that turns plain concrete into color tones with the appearance of Italian marble, tile, terracotta and natural stone.

- Requires little or no maintenance
- Available in a variety of natural earth tones
- Will not react to salts, alkali or ultraviolet rays
- Will not peel, chip, crack or fade

**Increte Stain-Crete**

### **Chrome-Etch Acid Stains**

Chrome-Etch Acid Stains from Specialty Concrete Products create natural, earth tone color shades that simulate the appearance of real stone or masonry.

- Available in 12 colors
- Ideal for interior floors
- Permanent color effect that won't fade, chip or peel

### **Decorative Concrete Institute dyes**

The Decorative Concrete Institute has released a new series of dyes available in 11 colors.

- Available in Caribbean Blue, Onyx, Royal Blue, Sunbaked Orange, Ruby Red, Forest Green, Sunrise Yellow, Wheat, Tree Bark, Mahogany and Graham Cracker
- All colors are available in water- or solvent-based, except for Caribbean Blue, which is available in only a solvent-based formula
